Update Regarding PXL Grade Nominations and Operational Capacity Limitations

Please be advised that in a tariff filing dated March 2, 2026 (Docket No. IS26-181), Pony Express lifted the temporary embargo regarding the transportation of PXL grade Petroleum on the Pony Express Pipeline system.

Although Pony Express will resume accepting nominations for PXL grade Petroleum, Shippers are notified that Pony Express is currently experiencing operational constraints impacting the handling and batching of PXL grade Petroleum. Due to these ongoing operational constraints, Pony Express has a limited physical capacity available for PXL grade shipments.

Pony Express will continue to monitor the operational conditions surrounding the PXL grade and will provide updates to Shippers as system capabilities change.

For questions regarding scheduling or the specific volume limitations for the upcoming nomination cycle, please contact Matt Hester (Commercial) at matt.hester@tallgrass.com or Lindsay Hildebrand (Scheduling) at lindsay.hildebrand@tallgrass.com.
